

`National Geographic` United States Atlas for Young Explorers

Other primary creator National Geographic

Its the US atlas every young explorer needs. And now, the third edition of the award-winning National Geographic United States Atlas for young explorers allows kids to explore both on its beautiful pages and interactively through a specially designed website. Readers can link directly to National Geographic's rich archive of multi-media resources - videos, photographs, maps, articles, sounds, games, and more - that will expand their knowledge and perspective about the country as well as its states and regions. All maps are custom-designed for kids aged 8 to 12 by the Society's world-famous cartographers. Locator maps and colour-coding throughout make it easy for kids to keep track of where they are and to quickly navigate from region to region and from state to state. The combination of large, detailed, yet easy-to-read maps, stunning, full-colour photo essays, information-packed thematic spreads, and Web site links sets this atlas apart from any other US atlas available to this age group.
