This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1867 Excerpt: ... Grey & Yellow Grey Light Yellow.. Grey Light yellow.. Greyish yellow Light yellow.. Light yellow., Grey Light grey... Grey..... Yellow Whitish yellow White Smoke grey Light yellow mag. 1-66 (Carb. lime 40-40 mag. 49-22 XXIV.--Miscellaneous Notices and Observations. Note on Fungi from Newton Cap Colliery.--None of our members have, I believe, paid any attention to the Fungi, and it is much to be desired that some one not afraid of honest work, and at a loss for a subject on which to exercise himself, would take up this unwrought field of research. The subject, except perhaps amongst the microscopic forms, would not be beset with any very serious difficulties. The recent publications of the Eev. M. J. Berkeley, the first living authority on this branch of botany, have much smoothed the way for students of the English species. His Outlines of British Fungology, together with the scribes of papers now appearing in the Intellectual Observer, constitutes an excellent guide. The only published memoranda on the Fungi of Northumberland and Durham are, so far as I know, those contained in Winchs Flora, which, of course, are very imperfect, and not at all consonant with the present state of science. Indeed many microscopic forms are there included amongst the Alga?. The life-history of the terrestrial Alga³ and their relations to the young forms of Lichens and Fungi is a subject full of interest, and having in it work for a lifetime: a most painstaking and able commencement of this enquiry has already been made by Dr. J. B. Hicks. Both for this, and for the study of the Fungi in particular, our damp northern climate offers many advantages, while the varied physical features of our two counties (comprising as they do great variety of so...
