

# Natural Supernaturalism

Edited by Elwood Kuni Waldorm

Natural Supernaturalism is the name of a chapter in Thomas Carlyles novel Sartor Resartus, which, says Dr. Stirling, contains the very first word of a higher philosophy as yet spoken in Great Britain, the very first English word towards the restoration and rehabilitation of the dethroned Upper Powers. The Nuttall Encyclopaedia states that Natural Supernaturalism refers to the supernatural found latent in the natural, and manifesting itself in it, or of the miraculous in the common and everyday course of things. Carlyles theory of Natural Supernaturalism influenced Ralph Waldo Emerson and Henry David Thoreau, two admirers of Carlyle. It therefore contributed greatly to American Transcendentalism.
