

Nature and the Bible : A Course of Lectures Delivered in New York, in December, 1874, on the Morse Foundation of the Union Theological Seminary (Classic Reprint)

J W Dawson

Excerpt from Nature and the Bible: A Course of Lectures Delivered in New York, in December, 1874, on the Morse Foundation of the Union Theological Seminary The subject assigned to the Lectureship founded by the late Professor Samuel F. B. Morse, LL.D., - The Relations of the Bible to the Sciences, - is one of so wide scope that any full or exhaustive treatment of it in a course of six lectures would be impossible. I have therefore restricted myself to the consideration of some of those points of contact of Natural and Physical Science with the Bible, which are now of the greatest importance and interest, with reference more especially to present controversies. Some of these subjects I have already treated in greater detail in my work entitled Archaia, or Studies of the Cosmogony and Natural History of the Hebrew Scriptures but in these Lectures, though less fully discussed, they are brought up to the present state of knowledge. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works.
