

The National Trust Desk Diary: 2003

Margaret Willes

This series introduces the core areas of chemical science, covering important concepts in an easy, accessible style. Each title contains a number of experiments and demonstrations, approached through the process of problem, hypothesis, experiment and conclusion. All the books support the QCA schemes of work and contain: definitions of important terms and explanations of key concepts formulae and word equations and the periodic table with explanatory notes. This title explores the concepts of elements and compounds.
